

Improving NonStop Information Services

CAIL enables organizations to move systems forward by -

- Modernizing systems
- Making NonStop integral in the Enterprise (and part of a corporate standard for Host access)
- Improving system security - including PCI compliance

1

Reflection or EXTRA!

Upgrade to an "Enterprise Solution" - a single icon on the screen for easy access to all systems (including NonStop) with security & modernization capabilities ... integrated CAIL / Attachmate Software

2

CAIL Suite

Enhance connectivity and security + modernize applications with extensive NonStop system access, encryption, interfacing, and integration capabilities

3

CAIL Security Facility

Add security to current NonStop systems - for encrypted sessions, file transfer, authentication, etc.

Importantly, CAIL enables organizations to address new requirements – with no application or system changes. Because of this, Customers are benefiting with proven and innovative solutions to evolve information services - quickly, with no risk.

Improving NonStop Information Services

CAIL Suite

Superior connectivity to NonStop Systems with built-in security and modernization capabilities to make it easier to move systems forward, improve the User experience, and produce results.

1. Includes 6530 communications with -
 - ▶ Browser / Windows access
 - ▶ Updated Windows version
 - ▶ Updated Plus version
 - ▶ Updated Java Versions for Windows / Linux / UNIX / Mac
2. Extensive built-in encryption capabilities (with the CAIL Security Facility)
 - ▶ CAIL clients work with any secure server software (CAIL SSH and SSL, comForte SSH, NonStop SSH)
3. Modernize by embedding 6530 data in applications to -
 - ▶ simplify systems / reduce complexity
 - ▶ better integrate and aggregate information on the screen
 - ▶ improve user productivity
 - ▶ leverage familiarity with current systems
4. Extended multi-session support with -
 - ▶ IndexView for multiple "live sessions"
 - ▶ MDI and SDI Windowing style
5. Choice of Server Centric or Client Centric deployment

For more details, please visit www.cail.com/specs

CAIL Security Facility

To quickly and easily have more trusted systems to comply with security regulations and better assure information privacy

1. Encryption with -
 - ▶ 6530 Sessions (any client)
 - ▶ Host to Host secure telnet and FTP
 - ▶ Pathway, RSC, ODBC, EXPAND, etc.
2. Secure File Transfers with - SFTP (SSH), FTPS (SSL), IXF, PCFILE
3. Range of encryption options including SSL, SSH, PCPROXY, PCSST
4. Authentication
5. Support for file attributes on upload

Reflection / EXTRA!

Enterprise Connectivity, Security & Modernization Solution (Integrated CAIL / Attachmate Software)

To improve user productivity as well as system usability and manageability, while lowering costs and simplifying information services across the organization.

1. Provide a single icon on the screen to access all Host based applications – consistently across platforms (ie: for heterogeneous environments with NonStop, Mainframe, Midrange, UNIX/Linux, DEC, Windows, Unisys systems) with 6530, 3270, 5250, VT, UTS, etc. communications
2. Better integrate NonStop information services into enterprise IT infrastructure and part of a corporate standard for Host access + Increase opportunities for NonStop in the business
3. Leverage the investment in all current systems for new business initiatives with the ability to produce results quickly, easily and economically – at no risk
4. Encrypt all data-in-motion (sessions and file transfers)

For more details, please visit www.cail.com/cabenefits, www.microfocus.com

Additional Partnering Solutions

In addition to CAIL being integrated into Attachmate Software for an Enterprise Solution, CAIL is included in NonStop Partner products from -

- Blackwood Systems
- Computer Security Products
- River Rock Software
- + others
