

“GO” Forward

with...

Superior connectivity to NonStop systems

CAIL Suite – For a more adaptive system infrastructure to improve the user experience and provide more powerful tools for technical personnel to address new needs

An “Enterprise Connectivity Solution” ...to better position NonStop systems in IT infrastructure

EXTRA! X-treme – A single icon on the screen to access all Host based applications

Improving system security

CAIL Security Facility – Quickly and easily address security requirements with encrypted sessions, file transfer and audit – at no extra cost

Support new system initiatives for – SOA, Web Services, BPM, Web Enabling

CAIL Studio – Leverage the investment in NonStop based information services to support new IT strategies and business requirements quickly, with no risk and fast ROI

CAIL

More Power. More Choice. More Value.

Improving NonStop based information services

CAIL Suite

Superior connectivity to NonStop Systems to provide a more adaptive system infrastructure with –

1. Selectable
 - Browser / Windows access to NonStop systems
 - Plus, Windows and Java Versions
...for greater connectivity flexibility
2. Extensive built-in security capabilities (with the CAIL Security Facility)
3. Enhanced Interfacing capabilities with HTML, AJAX and ActiveX to
 - simplify systems / reduce complexity
 - better integrate and aggregate information on the screen
 - improve user productivity
 - leverage familiarity with current systems
4. Extended multi-session support with:
 - IndexView for multiple "live sessions"
 - MDI and SDI Windowing style
5. Ability to modernize / GUI-ize application displays
6. Choice of Server Centric or Client Centric deployment
7. A non-intrusive licensing mechanism

For more details, please visit www.cail.com/specs

CAIL Security Facility

To quickly and easily have more trusted systems to comply with security regulations and better assure information privacy

1. Session encryption with –
 - Browser or Windows clients
 - Host to Host communications
 - Pathway, RSC, ODBC communications
2. Range of encryption options (ie: SSL, SSH, AES, DES, D-H, etc.)
3. Operates with CAIL and other Clients
4. Secure File Transfer (FTP, SFTP, FTPS, IXF, CAIL) and Audit capabilities

For more details, please visit www.cail.com/security

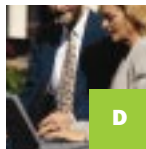

CAIL Studio

For SOA / Web Services / Web Enabling / BPM initiatives. CAIL Studio enables organizations to lower the cost and risk of moving current systems forward with newer technologies to satisfy new business demands and IT strategies. Plus, this is also a strategy to improve business processes and realize more benefits from current information services with the ability to –

1. Convert back end Telnet and middle tier HTML or SOAP into aggregated HTML based sessions or reusable SOAP
2. Better integrate information services for users
3. Have a graphical development and run time environment that is extensible with HTTP, HTML and SOAP
4. Automate processes
5. Produce results fast, with no risk

For more details please visit www.cail.com/wsintro

EXTRA! X-treme Enterprise Connectivity Solution (integrated Attachmate / CAIL Software)

To improve system usability, capability and manageability while lowering costs and simplifying the IT environment across the organization.

1. Provide a single icon on the screen to access all Host based applications – consistently across platforms (ie: for heterogeneous environments with NonStop, Mainframe, Midrange, UNIX/Linux, DEC, Windows, Unisys systems)
2. Better integrate NonStop information services into enterprise IT infrastructure
3. Leverage the investment in all current systems for new business initiatives with the ability to produce results quickly, easily and economically – at no risk
4. Increase the value, profile and opportunities for NonStop systems based information services in the enterprise
